This Pricing Supplement supplements the Prospectus relating to $20,000,000,000 Medium Term Notes of the Bank, as amended or supplemented, and the Prospectus Supplement. Holders should carefully read this Pricing Supplement, the Prospectus Supplement and the Prospectus to fully understand the information relating to the terms of the Note Securities and other considerations that are important to Holders. All three documents contain information Holders should consider when making their investment decision. If the information in this Pricing Supplement differs from the information contained in the Prospectus and/or the Prospectus Supplement, you should rely on the information in this Pricing Supplement.

The Note Securities differ from conventional debt and fixed income investments; repayment of the entire Principal Amount will depend on the performance of the Reference Portfolio and is not guaranteed (other than the minimum Maturity Redemption Payment of 1% of the Principal Amount). See "Risk Factors" in the Prospectus Supplement and the Prospectus. The Note Securities entail downside risk and are not designed to be alternatives to conventional debt or fixed income investments or money market instruments.

The estimated initial value of the Note Securities as of the date of this Pricing Supplement is $98.09 per $100 of Principal Amount (being equivalent to a $0.27 annual discount over the term of the Note Securities), which is less than the issue price. The estimated initial value is not an indication of actual profit that the Bank or its affiliates will realize, nor is it an indication of the price, if any, at which the Bank or any other person may be willing to buy the Note Securities. The actual value of the Note Securities at any time will reflect many factors, cannot be predicted with accuracy, and may be less than this amount. We describe our determination of the estimated initial value in more detail in the Prospectus. The Independent Dealer did not participate in the preparation of the estimated initial value for the Note Securities. See "Description of the Note Securities – Estimated Initial Value of Linked Note Securities" in the Prospectus.

The Note Securities constitute direct, unsecured and unsubordinated debt obligations of the Bank ranking *pari passu* with all other present and future unsecured and unsubordinated indebtedness of the Bank. **The Note Securities will not constitute deposits that are insured under the *Canada Deposit Insurance Corporation Act* or any other deposit insurance regime designed to ensure the payment of all or a portion of a deposit upon insolvency of the deposit taking institution.**

The Note Securities will not be listed on any securities exchange or quotation system. National Bank Financial Inc. intends to maintain, under normal market conditions, a daily secondary market for the Note Securities. National Bank Financial Inc. may, in its sole discretion, stop maintaining a market for the Note Securities at any time without any prior notice to Holders. There can be no assurance that a secondary market will develop or, if one develops, that it will be liquid. Moreover, Holders selling their Note Securities prior to Maturity may be subject to certain fees. See "Secondary Market for the Note Securities" in the Prospectus Supplement.

National Bank Financial Inc. is an indirect wholly-owned subsidiary of the Bank. **As a result, the Bank is a "related issuer" and a "connected issuer" of National Bank Financial Inc. within the meaning of the securities legislation of certain provinces and territories of Canada.** See "Plan of Distribution" in the Prospectus Supplement and in the Prospectus.
